

Media Specification Sheet

Product Name: Photo Lab Quality™ Glossy Paper
Product Category: Professional Choice
Item Number: 245251, 820205, 820250, 820106, 820199
Product Sizes Availability: 8.5x11, 11x17, A4, 13x19

Physical Characteristics:

	Specifications	Testing Method
Caliper:	10.25 mil	T-411
Basis Weight:(grams/sq. meter)	260 +/- 6 grams / sq. meter	T-410
Whiteness:	91.3%	JISP8123
Coated Side:	Single Side

Product Description:

This Photo Lab Quality™, resin coated photo based paper is the perfect addition to your digital darkroom. This acid free (neutral pH balance) base material lends itself well to archiving and will not yellow over time. The print surface touts a high gloss luster that promises to deliver impeccable results. It is designed for heavy ink saturation and is perfect for your high-resolution images. Photo Lab Quality™ inkjet paper also delivers a water-resistant topcoat to further protects your images from high humidity or accidental spills. This paper is universally coated for use with most inkjet printers in the market today.

Material Handling, Storage, and Shelf Life:

Material should be handled with white fabric gloves to prevent finger oil marking. Allow printed material 24 hours to dry before exposure to moisture. Folding of the material is not recommended. After printing, material should be stored in its original packaging. Limited One Year Warranty when stored at 70 degree Fahrenheit & 50% Relative Humidity and out of direct sunlight in the original packaging.

These specifications are for your guidance only, and without prior advice, they may be changed under engineering progress.
